Core Skills

- **Programming Language:** C#, TypeScript, Python, JavaScript
- **.NET:** ASP.NET, EF Core, WPF, WinForms, Blazor
- **Python Backend:** FastAPI, Pydantic, Eventsourcing Library
- **JS Frameworks:** Vue, ReactJS
- **Database:** PostgreSQL, MySQL, SQLite
- **Supabase:** DB, Row-level Security, Edge Function, Queues, Database Webhook, Cron Job
- **Testing:** NUnit, FluentAssertions, DUnitx, Playwright
- **Technical Knowledge:** REST API, Microservices, Docker, Redis, Git, Node.js, Webhook, WebSockets, Message Queue, Event-driven Architecture, Clean Code & Architecture, Inversion of Control, Design Patterns, OOP
- **Agentic Coding:** Claude Code, OpenCode, Deepseek, Qwen, Ollama

Professional Experience

.NET Backend Software Engineer | Associate Architect, *ActiveSystems Software Inc*

09/2024 – 08/2026 | Davao City

- Pioneered the adoption of Clean Architecture, SOLID principles, and unit testing across the engineering team, reducing code regression and improving overall system maintainability
- Led a cross-functional team to build a BIR-accredited F&B POS system, engineering core transactional logic for complex statutory discounts and tax calculations
- Led an engineering team as the backend tech lead to design and build a proprietary work management system using CQRS to decouple data persistence and optimized performance via Redis caching
- Architected a per-tenant database sharding strategy and leveraged PostgreSQL Row-Level Security (RLS) for data isolation, boosting query performance by 60%
- Engineered a custom .NET DI container auto-registration bootstrap logic using assembly scanning, eliminating manual configuration boilerplate and boosting developer velocity by 20%

Junior Software Engineer, *ActiveSystems Software Inc*

02/2023 – 09/2024 | Davao City

- Led a team of developers as Tech Lead to design and build an in-house Ticketing System using Delphi, improving the company's customer support performance by 30%
- Configured Continuous Integration pipelines using GitHub Actions to automate build and testing workflows across projects
- Designed interactive Figma prototypes for custom project management systems to align client requirements early
- Initiated project discovery using Domain Analysis, C4 models, and UML/Mermaid diagrams to map system boundaries
- Conducted rigorous cross-stack code reviews and team technical book reviews to enforce software standards and prevent architectural drift

Education

Bachelor of Science in Information Technology, *De La Salle John Bosco College*

2018 – 2022 | Bislig City
